Rush Service	Ask us

• This lab schedule is only a guideline. Cases with complication may take longer. • Due to the entire process of each case being handled by the same technician for quality assurance, there may be times when we ask for extended time to work on your case when the lab is very busy. • Missing items in the case that you send us could cause delay in schedule. Please make sure that all the necessary items are included before you send a case to us. • Cases are delivered by 5 PM of the due date. All cases are returned to you via Ground Service. Unforeseen events during shipping transition could result in a change to the expected delivery day. Please add some extra time when scheduling a patient's next visit. (Your case's delivery status can be tracked with courier company's tracking system.)
